**About me:** Junior Frontend Developer with 1+ year of experience. Built 5 pet projects using API, Express, MongoDB, Sanity, Telegram Bot, and modern tools like Material UI, Ant Design, and Tailwind CSS. My strengths include self-driven learning (picked up Python at a basic level independently), task prioritization, and being the teammate who hands out tissues when someone's stress tears drop to the keyboard.

**Skills:**  
**Programming:** JavaScript, TypeScript  
**Frameworks:** React, Node JS, Redux  
**Databases:** MongoDB, Sanity  
**API:** REST, JSON, Express  
**Tools:** jQuery, HTML/CSS, SCSS, Postman, Telegram Bot  
**Control System:** Git  
**IDE:** VS Code, WebStorm, Cursor

## Work experience / Projects

---

### 3-month internship at *Dara Solutions* (Almaty, Kazakhstan)

**Project:** National Education Database (Site: [NED](#))

**Stack:** JavaScript, React, Redux, CI/CD, GitLab

**Works:**

- Developed **5+ new modules** to improve usability and efficiency for educational staff.
- Fixed **30+ bugs**, enhancing system stability and performance.
- Implemented a **RESTful API** between frontend and backend, ensuring seamless data interaction.
- Worked with **Formik, Yup, UUID, and i18next**

### Pet-projects

**Project:** Blog website

**Stack:** JavaScript, React, Redux, NodeJS, MongoDB

**Works:**

- **Implemented responsive design**, ensuring optimal website display across various screen sizes and devices.
- Developed **authentication**, including user registration, login, and CRUD operations for posts.
- Built interactive features such as post/comment liking/disliking, commenting, and threaded replies.
- Designed a database system using **MongoDB**, with backend integration via **Node.js (Express)**.
- Libraries: Swiper (for touch sliders) and React Hook Form (for efficient form management).

# Abdymalik Batyrkulov - Junior Frontend-Developer

---

**Project:** Crypto website

**Stack:** JavaScript, React, Coinranking API, ant-d

**Works:**

- Built a **responsive website** with styling powered by **Ant Design**.
- Integrated **Coinranking API** to fetch real-time cryptocurrency data.
- Implemented **top 50/10 cryptocurrencies** (daily rankings), **search functionality** by coin name and **price history charts** with customizable time periods (linear graphs).
- Developed a **dedicated news portal** for crypto-related updates.
- Libraries: React Masonry CSS (for dynamic layouts) and Moment.js (for date/time handling).

**GitHub:** [github.com/abdymaleeq925/cryptnt](https://github.com/abdymaleeq925/cryptnt)

**Website:** [cryptnt.vercel.app](https://cryptnt.vercel.app)

**Project:** Pinterest like website

**Stack:** JavaScript, React, Redux, Sanity, MaterialUI

**Works:**

- Developed a **responsive Pinterest-inspired website**, styled with **Material UI** for a modern and consistent design.
- Implemented **Google authentication** using **react-google-login** for authentication.
- Built core features including **image creation and saving** and **categorization system** to organize images by topics
- Utilized **Sanity** as the headless CMS for database management
- Used **UUID** for generating unique identifiers

**GitHub:** [github.com/abdymaleeq925/binterest](https://github.com/abdymaleeq925/binterest)

**Project:** E-shop website

**Stack:** JavaScript, React, Redux, Sanity

**Works:**

- Implemented **fully responsive design** to ensure optimal viewing across all devices and screen sizes
- Developed **e-commerce functionality** including shopping cart system and Secure checkout process powered by **Stripe** payment integration
- Designed and implemented database using **Sanity**
- Utilized essential libraries such as **React Hot Toast** for user notifications and **Stripe.js** for payment processing

## Education

---

🎓 Istanbul Technical University — Mining Engineer (2012-2019)

🎓 ITC Bootcamp — “Frontend development” course (2024)

## Additional

---

📄 MERN Certificate (ITC, 2024)

💬 English C1, Turkish B2, Russian C2
